WORLD Organic

The Hon'ble Prime Minister of India, Shri Narendra Modi Ji has identified Organic Farming as a National Priority and emphasized the need for the growth of this sector. He has been constantly stressing on providing due priority to the organic food sector.

Following the footsteps of the Hon'ble Prime Minister and with the focus to provide a platform to the whole organic sector to connect and network, NNS Media Group is organizing 'World Organic Expo' at New Delhi.

The market for organic food products in India has been growing at a rapid pace over the last few years. Rising health consciousness among middle class consumers in major cities across India has been the key factor contributing to growth in the market. Unlike conventional food, which involves use of chemical fertilizers and pesticides, organic food products are manufactured using natural products. As a result, organic food products are free from chemical residues and are healthier compared to conventional food products. Organic food products include diverse food categories ranging from fruits & vegetables, dairy products, processed foods, pulses & food grains to other products such as beverages, confectionaries, etc. Implementation of various standards to improve the quality of organic food produced in the country is expected to propel growth in India's organic food market over the next many years.

Thus the 'World Organic Expo' provides an excellent platform to everyone connected with the organic farming and organic foods to showcase their organic products, innovations and advancements and reach the target audience.

AN EXCELLENT PLATFORM FOR SHOWCASING:

- Organic Dried Food
- Organic Health Food
- Organic Pulses, Spices & Seasoning
